

# Sentinel Landing Craft

For use with Wizards of the Coast's Star Wars Starship Battles miniature game. Available for download at [www.momirfarooq.com](http://www.momirfarooq.com)

Instructions

Star Wars and Sentinel Landing Craft are copyrighted by Lucasfilm.

Model based off the computer game X-Wing Alliance.

The textures used for this model are a mixture from the original X-Wing Alliance game and the textures done for the XWA Upgrade project by MJT (<http://www.xwaupgrade.com>), then modified to more closely resemble the ones from the Star Wars: Empire at War as well as Martin Sanger's paper model (<http://www.paperaviation.de/Science-Fiction/science-fiction.html>).

Like many ships from the "Expanded Universe", the actual design of the Sentinel has evolved a bit since it was first introduced. I simply picked the details that I liked best and combined them.
