## Lore

The effectiveness of droid starfighters has been debated in strategic circles for generations. While droid starfighters are capable of maneuvers that would crush even the sturdiest organic pilot, they lack the resourcefulness and cunning that living pilots bring into combat. To counter their shortcomings, vulture droids often attack en masse. Like the ground-based battle droid infantry, vulture droids were, for a time, controlled by a central command ship, but later generations were granted a limited degree of independence. When not in flight, the droid starfighter can transform into a walking mode allowing them to be used in surface patrols
